Election/Restrictions

DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 15-20, drawn to a Transmitter operating in a stand-alone mode, classified in class 455, subclass 91.
 - II. Claims 7-11, 21, drawn to a Receiver operating in a stand-alone mode, classified in class 455, subclass 130.
 - III. Claims 12-24, 22-29, drawn to a pair of Transmitter and Receiver capable of automatically exchanging communications channel, classified in class 455, subclass 73.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Group II and Group III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)).

In the instant case, the combination (Group I) as claimed does not require the particulars of the subcombination (Groups II&III) as claimed because Group I does not require receiving information. The subcombination (Group III) has separate utility such as automatically exchanging communications channel.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
